PROFESSIONAL SUMMARY

IT Administrator with 3+ years of hands-on experience in network security, Windows Server management and firewall administration. Has investigated and resolved real incidents on a production FortiGate firewall (brute-force attack, UDP flood), enriched indicators with threat intelligence and documented findings with MITRE ATT&CK mapping. Built a Wazuh SIEM home lab and publishes technical write-ups on Sysmon, Windows process analysis and threat hunting. Seeking an entry-level SOC Analyst role focused on threat detection and incident response.

EXPERIENCE

Information Technology Administrator, Dileep Crafts Private Limited, Jaipur — Sep 2023 – Present

- Administer Windows Server environment, network infrastructure and endpoint hardware, and manage network security for the organization.
- Investigated a recurring daily network outage: reviewed FortiGate authentication logs, found 5–10 brute-force login attempts per second from multiple countries against an HTTPS management port exposed to the internet, confirmed the exposure on Shodan, checked attacking IPs on AbuseIPDB, and closed the port to restore the network.
- Diagnosed a 70% CPU spike on a FortiGate 80F caused by a UDP flood: identified the bottleneck in anomaly logs, applied a hardware-accelerated DoS policy and cross-referenced malicious IPs, reducing CPU load from 85% to 15%.
- Investigated a Microsoft 365 account takeover via device code phishing: traced the attacker through Entra ID sign-in and Purview audit logs, revoked sessions, removed the rogue device, searched the tenant by attacker IP for other affected accounts, and hardened MFA, device code flow and DMARC.
- Documented incidents with MITRE ATT&CK mapping, threat intelligence enrichment and hardening recommendations.

IT Administrator Intern, Applied Electro-Magnetics Pvt Ltd, Noida — Jan 2023 – Jun 2023

- Worked with Ubuntu systems and computer hardware troubleshooting.

Technical Support Executive Intern, Ensonic Computech Pvt Ltd, Jaipur — Feb 2022 – Jul 2022

- Provided hardware and technical support.

Front-End Web Development and Graphic Design Intern, LN-TechInfo, Jaipur — Mar 2021 – Aug 2021

- Front-end development and graphic design work.

PROJECTS AND HANDS-ON WORK

SOC Home Lab: Wazuh SIEM

- Built a SOC lab with an Ubuntu Wazuh manager and Windows 11 and Kali Linux agents; configured manager-agent integration and verified log flow. Full guide: SOC Home Lab Setup with Wazuh

TryHackMe Advent of Cyber

- Completed the 24-day Advent of Cyber challenge. Profile: tryhackme.com/p/t.a.r.a

Technical Writing (Medium and LinkedIn)

- When “Authentication Passed” Isn’t Safe: Investigating a Device Code Phishing Attack in Microsoft 365: account takeover analysis using sign-in and audit logs
- How I Detected and Stopped a Real Brute Force Attack on a FortiGate Firewall: incident investigation with log review, Shodan and AbuseIPDB enrichment
- Network Stability: Managing UDP Traffic Spikes on FortiGate Firewalls: DoS policy to protect firewall CPU on a FortiGate 80F
- Demystifying the Windows Process Tree: parent-child process analysis and masquerading red flags
- Fileless Malware: The Invisible Threat That Lives in Your RAM: how it works and how to defend against it
- Also written: LinkedIn guides on essential Sysmon Event IDs, cloud misconfigurations and commonly exploited ports

TECHNICAL SKILLS

- **Security monitoring and detection:** SIEM log analysis (Wazuh), Windows event and Sysmon log analysis, firewall log analysis, Entra ID sign-in and Microsoft Purview audit log analysis, alert triage, anomaly detection
- **Vulnerability management:** network scanning, vulnerability identification, patching and remediation, system hardening
- **Incident response:** incident investigation, indicator (IP) enrichment with threat intelligence (AbuseIPDB, Shodan), containment (session revocation, rogue device removal), hardening, incident documentation and reporting
- **Threat knowledge:** MITRE ATT&CK mapping, phishing and account takeover (device code phishing), Windows process tree and parent-child anomalies, fileless malware, common attacks (brute force, DoS, SQL injection, XSS), CIA Triad
- **Networking:** TCP/IP, common ports and protocols, routing and switching, VLANs, subnetting, firewall policies (FortiGate 80F), network segmentation
- **Operating systems:** Windows Server, Windows 11, Linux (Ubuntu, Kali)
- **Security basics:** access control and least privilege, MFA, Conditional Access, email authentication (SPF, DKIM, DMARC), cloud misconfiguration awareness
- **Tools:** FortiGate, Wazuh, Sysmon, Microsoft 365 (Entra ID, Purview), Shodan, AbuseIPDB

EDUCATION

Bachelor of Vocational (B.Voc) in Information Technology and Networking, Bhartiya Skill Development University, Jaipur — Aug 2020 – Aug 2023

CERTIFICATIONS

CompTIA Security+ | Cisco Certified Network Associate (CCNA) | Fortinet NSE 1 | Fortinet NSE 2
